## FRONT END / WEB DEVELOPER

### ABOUT ME

The passion for Code and Web Development made me move to Prague to pursue the dream of being a part of the IT world. While attending a Code BootCamp did several workshops about different programming languages to learn more. The will and interest make me learn more and more each day.

My experience in design and multimedia make me more proficient through Front End Development. Since young age the IT and Tech world always kept me awake to figure out how things work. I'm cool guy too!
